

NATIONAL FILTER SERVICE®

# AMERICA'S FIRST NATIONAL FILTER SERVICE

ONE COMPANY. ONE INVOICE. ONE SOLUTION.

**FIND OUT WHAT AMERICA'S  
FIRST NATIONWIDE FILTER  
SERVICE CAN DO FOR YOU.**

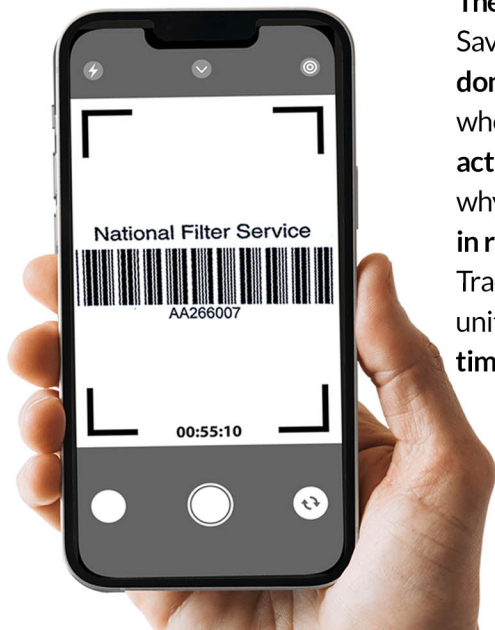

## **WE WROTE THE BOOK, SO TO SPEAK.**

National Filter Service® (NFS) has set the standard with tens of thousands of HVAC filter replacements for **restaurant, retail, and commercial properties** across the country across **over 30 years**. One company, one process, one price point, one invoice—across all your locations. Clean filters mean lower energy bills, fewer breakdowns, and a **clear return on investment**. Our exclusive Service Tracker barcode scanning system provides you confidence that the work is being **done right and on time**.

## **VERIFY EVERY FILTER CHANGE, EVERY TIME.**

The industry's only Barcode Verification. Savings only matter **if the work gets done**. It can be challenging to know whether a worker dispatched to a job **actually did what they claim**. That's why every NFS filter change is **verified in real time** through our unique Service Tracker barcode scanning system. Each unit carries a unique code, **scanned and timestamped** on-site. From rooftop to invoice, you'll know exactly when and where each filter was replaced — every location, **every time**.

## **ADVANTAGES OF WORKING WITH NFS**

- *America's first nationwide HVAC filter replacement service*
- *One company, one process, one price point, one invoice*
- *Consistent low pricing for every location*
- *Every filter change verified in real time with barcode scanning*
- *Eliminates guesswork about whether the work was completed properly*
- *Cancel anytime—no long-term contracts*

# WHETHER YOU'VE GOT 5 OR 500 LOCATIONS, NFS HAS YOU COVERED.

## SOLUTIONS THAT FIT.

As the first nationwide service dedicated **exclusively** to HVAC filter replacement, we've built a **reputation for consistency, accountability, and cost savings**. We wrote the book, so to speak. Whether it's 5 locations or 500, we deliver lower costs without upsells or hidden charges. NFS has been helping **facility managers, restaurants, and retail operators** turn filter replacement from an annoyance into a cost-saving opportunity for decades. We deliver proof, accountability, and consistent results—coast to coast.

## DON'T LET POOR FILTERS SHORTEN YOUR HVAC'S LIFE

Our frames are **100% recyclable** and built to last, making them both **dependable and sustainable**. *The filters themselves are a fiber blend that if laid as one continuous fiber would be 21 miles long.*

Our custom metal frame and pad system, **built to the exact dimensions of the original cardboard filters**, eliminate warping and air bypass. The refill pads offer **equal dust-holding power** to pleated filters, but with lower resistance and longer life—**reducing costs**.

## ADVANTAGES OF NFS FILTERS

- **100% recyclable metal frames, built to last and reduce waste**
- **Custom 1" and 2" metal frame and pad system fits original filter dimensions**
- **Eliminates warping and air bypass; lower airflow resistance extends filter life and reduces costs**

## WE TAKE THE GUESSWORK OUT OF FILTER REPLACEMENT

So stop worrying whether a high-priced HVAC service is maintaining your filters properly or just using filters as an excuse to recommend excessive repairs. Our filter program pays for itself and ends the guesswork in HVAC maintenance. Cancel anytime.

# REQUEST YOUR FREE HVAC FILTER AUDIT.

We will report back with a clear, data-based plan to cut waste, reduce service calls, and extend HVAC life.

**No guesswork. No sales pitch.  
Just facts.**
